### **DETAILED ACTION**

#### **Claim Rejections - 35 USC § 103**

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 6 and 9-11 are rejected under 35 USC §103(a). This rejection is set forth in the prior Office action mailed on December 07, 2010.

#### **Response to Arguments**

3. Applicant's arguments filed on January 19, 2011, with regard to the product claims, have been fully considered but they are not persuasive.

While the examiner concedes that the method of the cited references do not show the calendering/smoothing step between the drying and the rewetting of the web, claims 6 and 9-11 are product by process claims and the product of the cited references are very similar if not the same in properties, albeit made by a slightly different process. Note that a product is evaluated by its final properties and there is no evidence in the records that the products of the cited references is different in properties than that of the claims of the current application or that if any, such difference could not be obtained by obvious modification(s) of the product, e.g., if it could be said that the final products differ from one another by their brightness, such difference could be eliminated for example by

intensifying the coating pressure or increasing the dwelling time of the web through the nip, etc.

In the event any differences can be shown for the product -by-process claims 6 and 9-11 as opposed to the product taught by the cited references such differences would have been obvious to one of ordinary skill in the art as routine modification of the product in the absence of a showing unexpected results, see *In re Thorpe*, 227 USPQ 964 (CAFC 1985).

As the afore mentioned claims are product by process claims, it is deemed that "[A]ny difference imparted by the product by process claims would have been obvious to one having ordinary skill in the art at the time the invention was made because where the examiner has found a substantially similar product as in the applied prior art the burden of proof is shifted to the applicants to establish that their product is patentably distinct, ..." *In re Brown*, 173 U.S.P.Q. 685, and *In re Fessmann*, 180 U.S.P.Q. 324. Further, "[P]rocess limitations are significant only to the extent that they distinguish the claimed product over the prior art product." *In re Luck*, 177 U.S.P.Q. 523 (1973)

#### **Allowable Subject Matter**

4. Claims 4-5 and 7-8 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not teach nor suggest a method of cast coating as claimed. Specifically the prior fails to teach or suggest the smoothing operation of the dried coated layer after drying, but before rewetting. See also applicants remarks filed on January 19, 2011.

6. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

### **Conclusion**

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
